I am a Software Developer with experience in designing and developing responsive websites with a keen eye for delivering optimal user experiences across various devices. Combining technical skills with creativity, I craft functional, visually engaging digital solutions. Passionate about pushing boundaries and finding innovative solutions to complex problems, making me not just a developer, but a technical creative at heart.

I possess strong communication and interpersonal skills, allowing me to thrive in dynamic and challenging environments. Quick to learn and adapt to new systems, I am self-motivated, well-organized, and enthusiastic about taking on new challenges.

EXPERIENCE

- **SQL Soft, Perth (01/2024 – 12/2024)**
Developed an internal website using React and conducted data analysis using Microsoft Power BI.
 - **Boom Radio (2024) – boomradio.com.au**
As part of a team, developed a website using WordPress for a student-ran radio station. I had also contributed to Figma prototypes and conducting user tests.
 - **Company Info (2024) – company-info-psi.vercel.app**
Website which shows info about any publicly traded U.S. company. It uses 2 API's and was created using React and Next.js.
 - **Portfolio Website (2024) – tosik.net**
Personal website which showcases my projects, skills, and about me. It was created using React and Next.js.
 - **VEGAS Pro Tips (2023) – vegasprotips.net**
Website about showing tips and tricks in a beautiful way for a video editing software I have lots of experience with.
-
